4. APP Connections

4.1 Overseas users

You can download “Smart life“ or “Tuya smart” in App store and Google Play.
Or you can scan the below 2 QR codes.

Tuya Smart App

Smart Life App

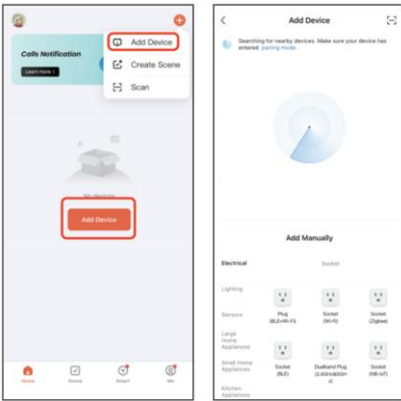

4.2.1 Confirm that the phone is connected to 2.4G Wi-Fi, then turn on Bluetooth and Location.

4.2.2 Press “Wi-Fi” button for 5 seconds, Wi-Fi Blue indicator begins to flash, it is ready for network connections.

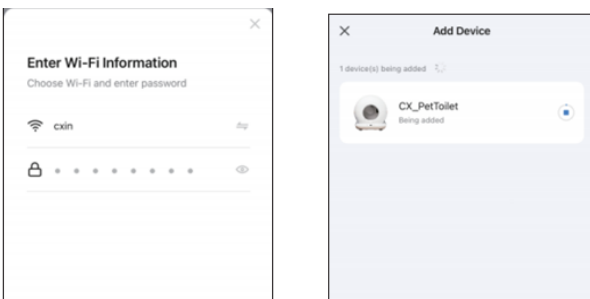

4.2.3 Open your phone App to add device by Bluetooth or WIFI.

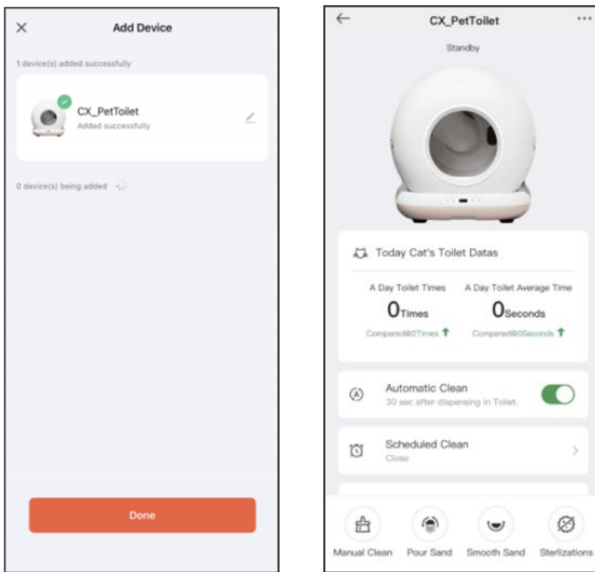

4.2.4 If your phone is on with Bluetooth, the cat litter device will enter in Pairing mode. Just click to go in.

4.2.5 Continue “Next” after putting in Wi-Fi code and wait to connect.

4.2.6 Enter APP after connecting.

Notice:

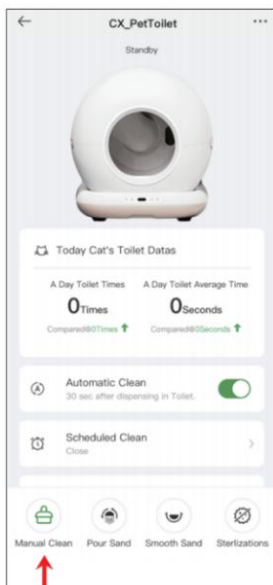

If the network configuration fails or a timeout message is displayed, check the following possibilities:

- Whether Wi-Fi, Bluetooth, and Location switch are enabled at the same time.
- Whether the Wi-Fi is in 2.4G band and whether the phone is connected to 2.4G band Wi-Fi network. (The product cannot recognize the 5G band network.)
- Whether the Wi-Fi indicator on the panel is flashing during network configuration.
- Whether the Wi-Fi network in your home is faulty or down, please check whether other devices can use the network normally.
- Whether the Wi-Fi password is correct.
- Whether the Wi-Fi signal is too bad, please move the machine to a nearby router and reconnect.
- The router connects to many wireless devices, causing IP address conflicts.

5. Operating

5.1 Clean

Click "Manual Clean" on the panel or Same "Manual Clean" icon on the App for cleaning.

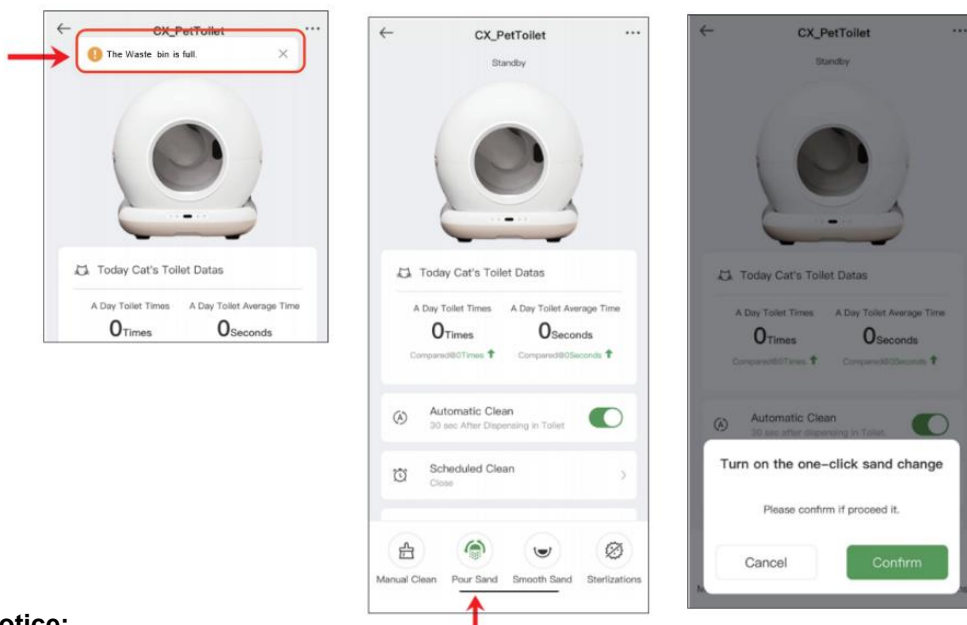

Notice:

- During the cleaning process, you cannot implement other functions; you have to wait until the cleaning process is completed.
- During cleaning, you can cancel it by short pressing the "Manual clean" button.

5.2 Replace litter

- ① Replace the garbage bag with an empty one (to avoid that the original one is already full of litters)
- ② Make sure the remaining sand is almost used out (to avoid spillage when sands pouring)
- ③ Press the "Sand Pour" button and wait for the machine to clear the remaining litter
- ④ Replace the garbage bag with an empty one again after clearing sand

Notice:

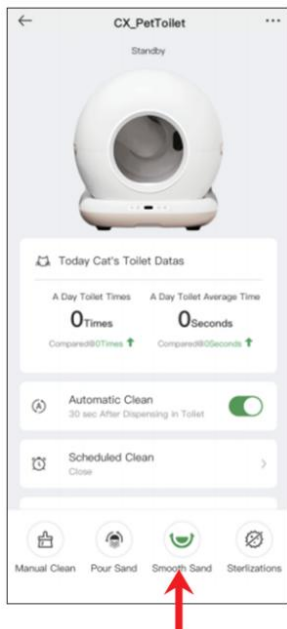

- If you already operated wrongly or forgot to replace new bag, you can click the "Pour sand" at once.
- When the waste bin is full, the Wi-Fi button will light up red and flash, and the app will send you a reminder message.

5.3 Add cat litter

After filling cat litter, the “Smooth Sand” indicator will be in blue for about 10 seconds, press and hold the “Smooth Sand” button for five seconds to calibrate, or wait for five minutes for calibration.

Notice:

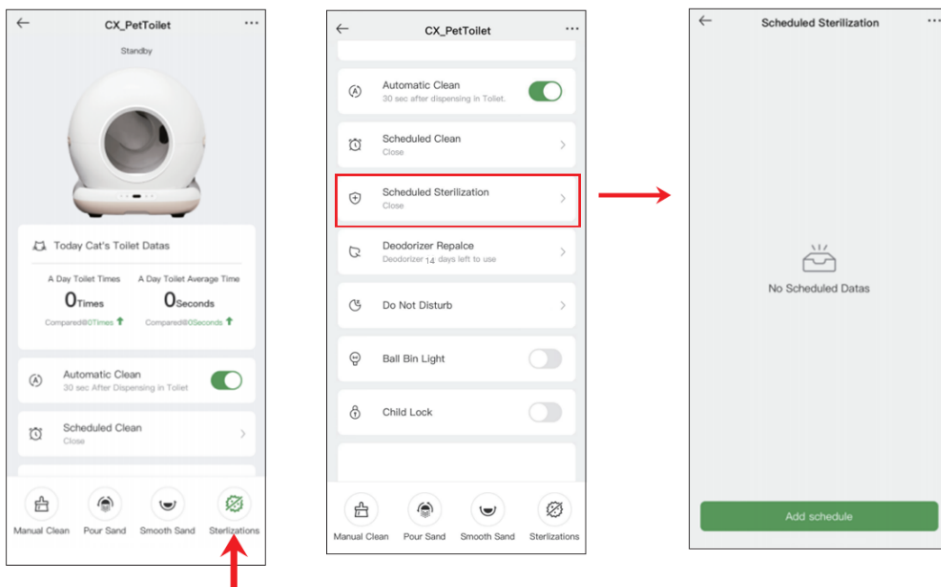

- This device has a protective function during operation. During cleanup, it will stop as soon as the cat is approaching the entrance, or the cat litter box feels the weight.
- After filling sands, please ensure that the liter of sands does not exceed the MAX line to avoid overflow when pouring the litter.
- Please ensure even distribution of the litter when pouring, avoiding piles near the entrance.
- You can adjust the litter surface by using the "Smooth Sand" button or the "Smooth Sand" button in the App.

The amount of cat litter should not exceed Max line

5.4 Healthy Sterilization

- ① One-key sterilizations: 3 0minutes-working and automatically stop.
- ② Sterilizations Schedule setting: Time /duration.

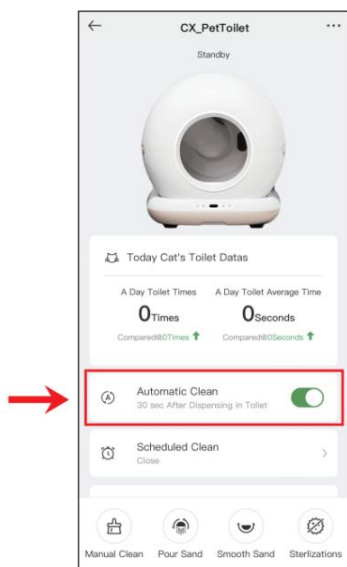

Notice:

- Turn on the UV sterilization function, and it will automatically turn off after the sterilization time reaches about 30 minutes. It will stop automatically once cat enters in, continue to work after cat leave

5.5 Automatic Clean

Click “Automatic Clean” on device panel button or App. The device will automatically detect the cats in and out (It will start automatically after the device is powered on and self-checking).

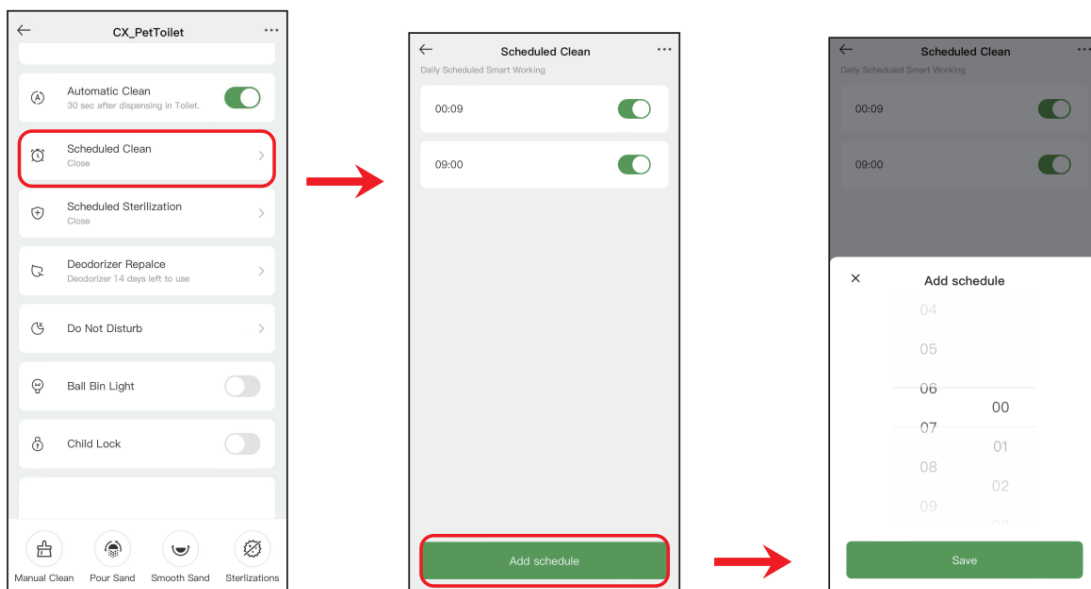

Notice:

- If the kitten weighs less than 1 kg or is pregnant, please turn off the auto-cleaning on the APP, then click “Manual Clean” according to the actual situation.
- If you are using litter that clumps quickly, you can go to Automatic Clean and enter to set up the "Shovel Poop Delay Time", then the device will wait for time after pets dispensing in toilet. such as 1 minute, to clean the litter as quickly as possible and reduce the smell.
- If the cat enters the bin for more than 10 seconds, the cat is judged to have potty behavior.
- If the button on the App can't be controlled and synchronized with the panel buttons temporarily, please check the network status or re-configure the network, or click the buttons on the App and repeat once or twice.

5.6 Schedule Clean

Put up a clean schedule according to needs. Daily routine cleaning.

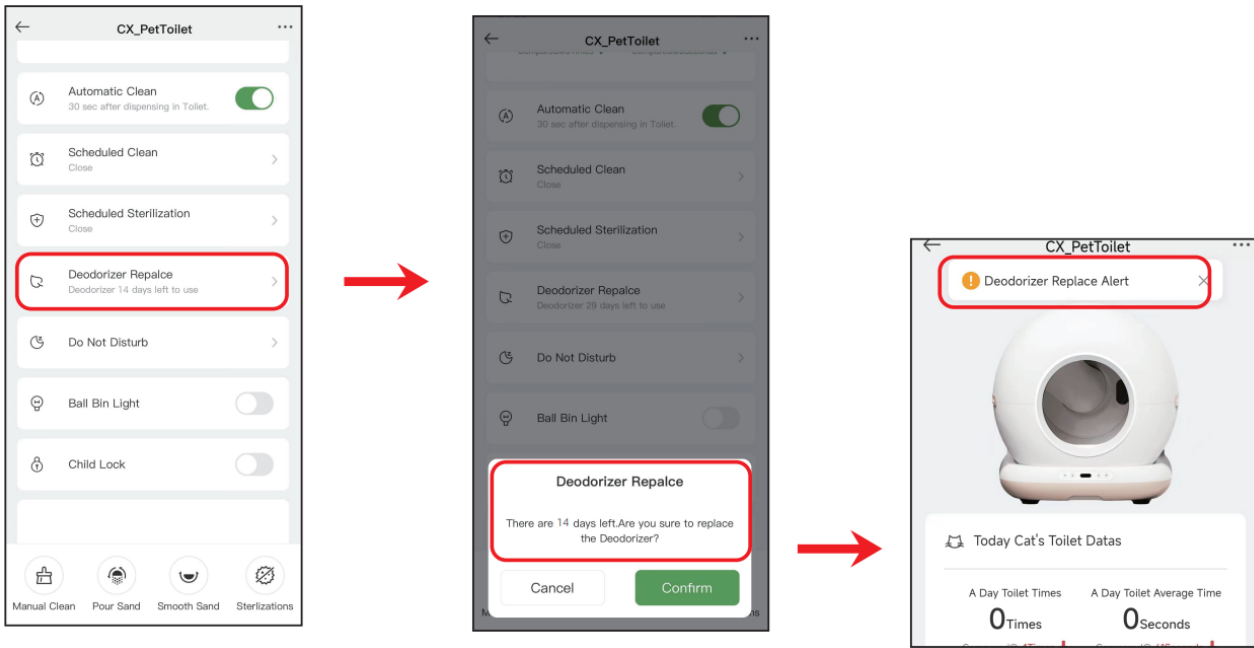

Notice:

- If there is an overlap with Do Not Disturb Mode, the device will do cleaning (not sterilized) and enter Do Not Disturb Mode again.

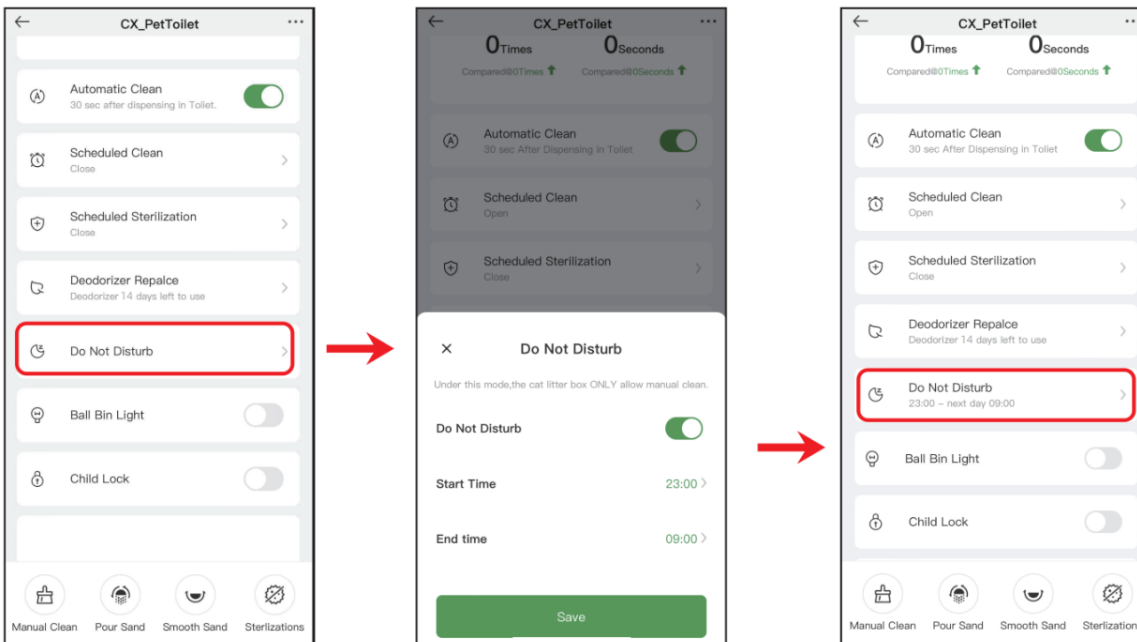

5.7 Deodorizer Replacement

To check how long the deodorizer has been used and valid time for it.

5.8 Sleep mode

When cat litter box is placed in the bedroom, you can set in the App “Do not Disturb” to prevent the night-time activation from disturbing sleep.

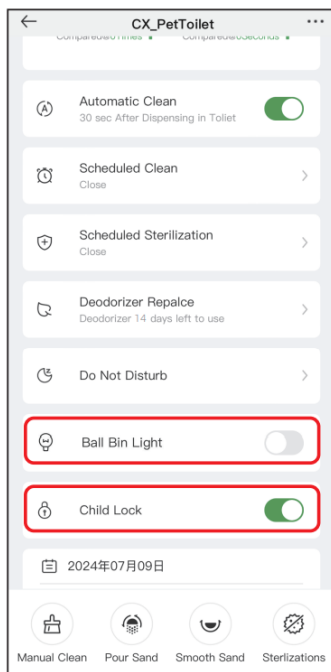

Notice:

- Under Do Not Disturb mode, only support Manual Button Operation.

5.9 Ball Bin Light and Child Lock

- ① Click “Child Lock” on the APP to turn on or off it or long press the “Sand Pouring” for 5 seconds to unlock the child lock.
- ② Ball Bin Light: You can turn on the light to check the inside of the ball bin in the nighttime.

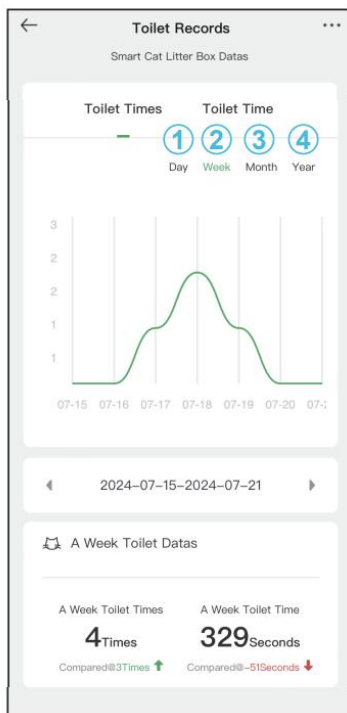

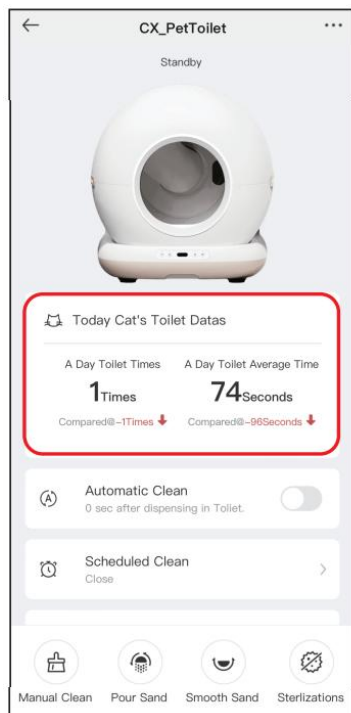

Notice:

- Child lock mode is only applicable to device front panel buttons.

5.10 Toilet Statistics

- ① Day: Check the toilet statistics of the 24 hours of a day.
- ② Week: Check the toilet statistics of a week.
- ③ Month: Check the toilet statistics every day of a month.
- ④ Year: Toilet statistics for each month of a year.

6. Replace garbage bag

When the Wi-Fi button Indicators in RED blink, or APP msg push "The waste bin is full", you need to change the waste bag.

6.2 Wash bin

Notice:

- Ball bin/waste bin including rear cover can be washable. The base can only be wiped with water.
- The deodorant can be used for 14 days, and in APP you can check the days it can be used.

7. Fault Self-Check method

Icon	Color	Status	Reason	Solution
	Blue	Flashing	Wi-Fi not connected	Long press Wi-Fi button for 5 seconds for App connection
	Red	Flashing	Full Garbage box or object blocking	Replace garbage bag or check whether there is blocked object
		Steady	Garbage cover is not installed well	Place garbage cover well
	Blue	Steady	Add litter without calibration, the machine stops working	Long press smooth sand button for 5 seconds or wait 5 minutes. (When cats enter, this icon will be on always)

8. Question & Answer

Q: Why does the APP's weight data not match my cat's weight?

A: Please check if it is caused by your pet's curiosity to access the device with just two feet.

Q: Why does the device not work and the control panel shows an abnormal red or blue light?

A: Please refer to the Control Panel Guide: For details on how to deal with the abnormality, please refer to the Control Panel Guide 3.

Q: What kind of cat litter should be used for this product?

A: Mixed litter, tofu litter, bentonite clay, mineral sand, etc. The length should not exceed 8mm

Q: Why does the product not work, and the Wi-Fi button light is red after replacing the litter bag?

A: When replacing the garbage bag, the edge is beyond the infrared sensing line, and the garbage bag needs to be organized and levelled out. Whether there are objects in the waste bin, which cause the top of the waste bin to be on the high side, and thus the waste bin is beyond the infrared sensing line.

Q: Why is the pet weight inaccurate?

A: There is no cat litter in the product, long press the clean button for 5 seconds for product weight calibration (this operation must be done without cat litter, non-special cases are recommended not to do this operation).

Q: Why is there a blue light on the smoothing button when replacing cat litter or pets enter the ball bin?

A: Because the weighing module senses that there is cat litter or pets access to the ball bin: Because the weighing module can sense that there is an object to access, if it is to add cat litter, you can long press for 5 seconds to calibrate or wait for 5 minutes. If pets go to enter, it can be done without a hitch.

Q: Why doesn't it stop working immediately when a pet enters to Cat toilet ball ?

A: The weight sensors will take 1-2seconds to judge. Don't worry, the device is designed in safety evaluations which to avoid pinching the cat. Hence there is no risk if pet goes into ball and delay stop in 1-2 seconds.

Q: Why is the cat litter not completely cleaned during the cat litter pouring operation?

A: Due to the multi-layers of cat litter being put in ball bin, as per our experiment, it is suggest to operate the sand pouring 2 times and it will be completely clean up.

Q: Why can't I upload my cat's weight as soon as my pet enters the cat litter box?

A: No, because when the pet enters the ball bin, the weight sensors detected has not yet stabilized, and the data can only be uploaded after the weight has stabilized, it will take around 10 seconds for the device system to judge and data message push to app.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1) This device may not cause harmful interference, and
- 2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced Radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could avoid the user's authority to operate the equipment.
